PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in Data Structures and Algorithms, solving 300+ problems on LeetCode. Proficient in Java and Python with experience building scalable backend systems and microservices. Hands-on experience with SQL and NoSQL databases, distributed systems, and REST APIs. Interested in high-performance systems, backend engineering, and quantitative infrastructure.

EDUCATION

Don Bosco Institute of Technology

Bachelor of Engineering in Computer Science (CGPA: 8.56/10)

Mumbai, India

2023 – 2027 (*Expected*)

EXPERIENCE

Full Stack Developer Intern

Dec 2025 – Jan 2026

DekNek3D

- Developed scalable REST APIs using Node.js and Express.js for automated file-processing workflows, improving system efficiency by 30
- Built REST APIs using Node.js and Express.js to automate file-processing workflows, improving efficiency by 30%
- Optimized backend processing pipelines for handling large 3D file transformations
- Collaborated in an Agile environment focusing on debugging, performance improvements, and reliability

PROJECTS

AI-Github Analyzer | GitHub

Python, FastAPI, React.js, PostgreSQL, pgVector, Gemini API

- Built an AI-powered GitHub analyzer for repository metrics and code-quality insights
- Implemented RAG using pgVector and PostgreSQL for context-aware code querying
- Designed backend pipelines for repository parsing and embedding generation

Code-Mate - Real-Time Collaborative Coding Platform | GitHub

React.js, Node.js, Express.js, Yjs, WebSocket, Piston API

- Developed a collaborative code editor using CRDT-based synchronization with Yjs
- Integrated WebSockets and Piston API for real-time editing and code execution
- Implemented room management and AI-assisted coding support using Gemini API

Swactha Dashboard - Smart Campus Monitoring System | GitHub

Python, YOLOv8, React.js, WebSocket, OpenCV

- Built a real-time cleanliness monitoring system using YOLOv8-based detection
- Trained object-detection models on 13k+ augmented images for garbage detection
- Designed a frame-processing pipeline using OpenCV and WebSockets for analysis

TECHNICAL SKILLS

Programming: Java, Python, C++, JavaScript

Backend: Spring Boot, Node.js, Express.js, REST APIs, Microservices

Frontend: React.js, HTML, CSS, Tailwind CSS

Databases: MySQL, MongoDB

DevOps & Tools: Git, Docker, Postman, AWS

Core CS: Data Structures & Algorithms, Operating Systems, DBMS, OOPS

CERTIFICATIONS & ACHIEVEMENTS

- Python Bootcamp - Udemy
- Google GenAI Study Jam - Google Developer Groups Community
- Solved 300+ DSA problems on LeetCode with 100-day coding streak
- Built 2D Unity game “Snow and Water” during game development challenge
